Dear Mr. Zuckerman and Members of the Planning Board,

I look forward to the meeting this Thursday. There has been a great swath of emotional statements and gossip about how all the issues are already settled.

I trust that the Planning Board has the strength and honesty to rely on the relevant rules and regulations appropriate to the Project. In fairness to Applicants of other Town projects, everyone must respect and follow the official guidelines.

There are many problematic issues involved. However, for me the major issues are our responsibility to protect magnificent open space, and our protection of the rural character of Philipstown - not a slide into New Westchester.
