Project Name: Depaolis Site Plan

Project Description: ~~The Applicant proposes to construct a new 48'x80' garage/barn on the property to house equipment for his Landscaping Company, a Service Business, which is an allowed use in the HC Zoning District. The site will be improved with an extension of the driveway, employee parking and material sorters. The use of the existing single-family home will continue and the existing apartment of the garage will be utilized for the office of the Landscape Company. The existing well and septic are adequate for the existing and proposed use. The new garage will not have water service or wastewater disposal requirements. Minimum lighting is proposed and a landscape plan has been developed. The employees will arrive at the site and leave for the day in company trucks prior to the Route 9 am peak hour and will return to the site and leave for the day prior to the Route 9 pm peak hour.~~

ZONING INFORMATION

175-7 Zoning District: HC

175-10 Proposed Use: Existing Residential to Remain, New Commercial Service Business

Proposed Accessory Use(s): _____

175-7 Overlay Districts on the property:

	<u>Yes or No</u>
175-13 Floodplain Overlay District – NFIP Map ----- (FPO)	<u>No</u>
175-18.1 Mobile Home Overlay District ----- (MHO)	<u>No</u>
175-14 Cold Spring Reservoir Water Shed Overlay ----- (WSO)	<u>No</u>
175-15 Scenic Protection Overlay ----- (SPO)	<u>No</u>
175-16 Aquifer Overlay District ----- (AQO)	<u>No</u>
175-18 Open Space Conservation Overlay District ----- (OSO)	<u>No</u>
175-35 Within 100 foot buffer of Wetlands or Watercourse -----	<u>Yes</u>
175-36 Steep Terrain -----	<u>No</u>
175-36 Ridge Line Protection -----	<u>No</u>
175-37 Protection Agricultural-----	<u>No</u>

Project Name: Depaolis Site Plan

Maximum footprint non-residential structures	40,000 sf	n/a	3,840 sf	Yes	No

SUBMISSION:

13 copies with **one electronic file in .pdf format** of the following;

1. Pre-Application meeting decision and comments
2. Application
3. Proof of Ownership
4. Site Plan
5. A long-form Environmental Assessment Form or Draft Environmental Impact Statement.
6. An agricultural data statement as defined in §175-74, if required by §175-37C.
7. The Site Plan application fee, as established by the Town Board and any required escrow deposit for review costs, as required by the Planning Board.
8. FEE: _____ Received: _____
9. Escrow: _____ Received: _____

ARTICLE IX SPECIAL PERMITS AND SITE PLAN REVIEW

§175-60 PURPOSE AND APPLICABILITY

A. It is the policy of the Town of Philipstown to allow a variety of uses of land, provided that such uses do not adversely affect neighboring properties, the natural environment, or the rural and historic character of the Town. Many uses are therefore permitted only upon issuance of a Special Permit by the Planning Board, in order to ensure that these uses are appropriate to their surroundings and consistent with the purposes of this Chapter. Some uses are allowed by right, subject only to Site Plan approval (see Use Table in §175-10). Communication towers, soil mines, and certain solar and wind energy facilities (see §175-30E(2)) require a Special Permit issued by the Zoning Board of Appeals. Adult entertainment uses and uses not listed on the Use Table (if not prohibited by §175-10C) require a Special Permit issued by the Town Board. In reviewing Special Permit applications, the Town Board and Zoning Board of Appeals shall follow the procedures and standards established for the Planning Board in this Article IX.

B. Accessory uses or structures used in connection with a Special Permit or Site Plan use shall be subject to the same approval requirements as the principal structure or use. Accessory structures used in connection with an institutional use in the IC district are governed by the provisions in §175-10J.

C. Minor and Major Projects

In order to tailor the scope of a project review to the scale of a project, applications are divided into two categories, major and minor. In recognition of their lesser impact, minor projects involve simpler application materials, a more streamlined review process, and less detailed findings requirements, while major projects undergo a more detailed and rigorous review procedure because of their greater impact. The classification of major and minor only applies to projects that require site plan or special permit review. This classification system does not apply to development allowed by right without review by the Planning Board, Zoning Board of Appeals, or Town Board.

1. A Minor Project is a Special Permit or Site Plan application for a project that does not exceed any of the following thresholds (over a five-year period):

- a. Construction of four multi-family dwelling units or a lodging facility with six bedrooms.
- b. Construction of facilities or structures for a non-residential use covering 3,000 square feet of building footprint.
- c. Alteration of existing structures or expansion of such structures by 1,000 square feet.
- d. Conversion of existing structures totaling 5,000 square feet to another use.
- e. Alteration and active use of 10,000 square feet of land, with or without structures.
- f. Construction of a structure that is 50 feet in height above average grade level (provided that it otherwise complies with this Chapter or is the subject of an area variance).

2. A Major Project is a Special Permit or Site Plan application exceeding any of the Minor Project thresholds.

D. In reviewing any project subject to special permit or site plan approval, the reviewing board should consider —Putnam County Pathways: A Greenway Planning Program Linking Putnam’s Open Space, Historic, Cultural and Economic Resources,|| as amended from time to time, as a statement of land use policies, principles and guides.

§175-66 **PROCEDURE** FOR MAJOR PROJECT SITE PLAN APPROVAL

A. Applicability

This §175-66 applies to Major Project Site Plan approval applications where no Special Permit is required. See §175-67 for Minor Project Site Plan applications.

B. Pre-application Meetings

Before filing an application, a preliminary conference with the Zoning Administrative Officer and one Planning Board member designated by the Planning Board Chair is required to discuss the nature of the proposed use and to classify it as a Major or Minor Project. If the Zoning Administrative Officer classifies the project as a Major Project, a preliminary conference with the Planning Board is required to discuss the nature of the proposed use and to determine the information that will need to be submitted in the Site Plan.

C. Submission

All Major Project Site Plans shall be submitted, with multiple **13 copies** with **one electronic file in .pdf format** as required by the Planning Board, to the Zoning Administrative Officer, who shall distribute them to the Planning Board and such other municipal boards, officials, and consultants as the Planning Board deems appropriate. The Planning Board's consultant or a designated Town employee shall make the initial determination as to whether or not the application is complete for the purpose of accepting it for review. In addition to the Site Plan drawings, the applicant shall submit:

1. A long-form Environmental Assessment Form or Draft Environmental Impact Statement.
2. An agricultural data statement as defined in §175-74, if required by §175-37C.
3. The Site Plan application fee, as established by the Town Board, and any required escrow deposit for review costs, as required by the Planning Board.

D. Application for Area Variance

Where a proposed Site Plan contains one or more features which do not comply with the dimensional regulations of this Chapter, application may be made to the Zoning Board of Appeals for an area variance pursuant to §175-59F without a decision or determination by the Zoning Administrative Officer.

E. SEQRA Compliance

Upon receipt of application materials it deems complete, the Planning Board shall initiate the New York State Environmental Quality Review process by either circulating the application and Environmental Assessment Form to all involved agencies (if coordinated review is undertaken) or by issuing its determination of significance within 20 days. Where the proposed action may have a significant effect on the environment, the Planning Board shall issue a positive declaration and require the submission of a Draft Environmental Impact Statement (DEIS). No time periods for decision making in this Chapter shall begin to run until either acceptance of a DEIS as satisfactory pursuant to New York State Department of Environmental Conservation Regulations or the issuance of a negative declaration.

F. Public Hearing and Decision

1. The Planning Board shall hold a public hearing on the Site Plan and shall follow the provisions on notice, agricultural data statements, county review, Conservation Board review, and time limits for Special Permits in §§175-62E through G.
2. Criteria for decisions on Site Plans shall be limited to those listed in §175-65D. In granting Site Plan approval, the Planning Board may impose any conditions which it considers necessary to fulfill the purposes of this Chapter. These conditions may include increasing dimensional or area requirements, requiring the set-aside of perpetual open space land pursuant to §175-20, specifying location, character, and number of vehicle access points, requiring landscaping and/or screening, requiring clustering of

structures and uses in order to preserve environmental resources and minimize the burden on public services and facilities, and/or requiring performance guarantees to insure the completion of the project in accordance with the conditions imposed.

3. A copy of the decision shall be immediately filed in the Town Clerk's office and mailed to the applicant. resolution of either approval or approval with modifications and/or conditions shall include authorization to the Planning Board Chairman to stamp and sign the Site Plan upon the applicant's compliance with applicable conditions and the submission requirements stated herein.

4. If the Planning Board's resolution includes a requirement that modifications be incorporated in the Site Plan, conformance with these modifications shall be considered a condition of approval. If the Site Plan is disapproved, the Planning Board may recommend further study of the Site Plan and resubmission to the Planning Board after it has been revised or redesigned.

§175-65 SITE PLAN REVIEW AND APPROVAL

A. Applicability

1. Site Plan approval by the Planning Board shall be required for all permitted uses listed on the Use Table as requiring Site Plan approval only. Site Plan review shall be included as an integral part of the Special Permit approval process and no separate Site Plan approval shall be required for uses requiring a Special Permit.
2. The procedures for review of Site Plans for Major and Minor Projects (as defined in Article XII) are described in §§175-66 and 175-67. Agricultural structures with a footprint of over 15,000 square feet shall require Minor Project site plan approval. Agricultural structures with a footprint of 10,000 square feet or less are exempt from site plan approval requirements.
3. Site Plan approval shall also be required for any development which is the functional equivalent of a land subdivision but which is structured for ownership purposes as a condominium project. In such cases, the Planning Board shall apply all relevant review criteria contained in the Land Development Law (Chapter 112 of the Town Code) as well as the provisions of this Chapter.

B. Required Information for Site Plan

An application for Site Plan approval shall be accompanied by plans and descriptive information sufficient to clearly portray the intentions of the applicant. Minor Project Site Plans shall contain the information required by §175-67C and other information listed below if the Planning Board deems such information necessary to conduct an informed review. Major Project Site Plans shall be prepared by a licensed professional engineer, architect, surveyor, or landscape architect, and shall include the following (unless waived):

SITE PLAN CHECK LIST

1. A location map drawn at the scale of 2,000 feet to the inch or larger (or other convenient scale acceptable to the Planning Board) that shows the relationship of the proposal to existing community facilities which affect or serve it, such as roads, shopping areas, schools, etc. A vicinity map shall also be submitted that shows all properties, subdivisions, streets, and easements within 500 feet of the property. Such maps may be superimposed on a United States Geological Survey or New York State Department of Transportation map of the area.
2. An existing conditions map, showing existing buildings, roads, utilities, and other man-made features, as well as topography and all existing natural land features that may influence the design of the proposed use such as rock outcrops, single trees eight or more inches in diameter located within any area where clearing will occur, forest cover, soils (including prime and statewide important agricultural soils), and ponds, lakes, wetlands and watercourses, aquifers, floodplains, and drainage retention areas.
3. A Site Plan, drawn at a scale and on a sheet size appropriate to the project. The information listed below shall be shown on the Site Plan and continuation sheets.
4. Name of the project, boundaries, date, north arrow, and scale of the plan. Name and address of the owner of record, developer, and seal of the engineer, architect, surveyor, and/or landscape architect. If the applicant is not the record owner, a letter of authorization shall be required from the owner.
5. The location and use of all existing and proposed structures within the property, including all dimensions of height and floor area, all exterior entrances, and all anticipated future additions and alterations.

✓ 6. The location of all present and proposed public and private ways, off-street parking areas, driveways, outdoor storage areas, sidewalks, ramps, curbs, paths, landscaping, walls, and fences. Location, type, and screening details for all waste disposal containers shall also be shown.

✓ 7. **The location, height, intensity, and bulb type (sodium, incandescent, etc.) of all external lighting fixtures.** The direction of illumination and methods to eliminate glare onto adjoining properties must also be shown.

✓ 8. The location, height, size, materials, and design of all proposed signs in compliance with §175-39. In lieu of specific sign proposals in connection with the site plan submission, the applicant may submit and the Planning Board may approve a general sign plan and program for the premises, specifying intended locations, sizes, areas, message, design, and illumination.

✓ 9. The location of all present and proposed utility systems including:
_____ a. Sewage or septic system;
_____ b. Water supply system;
_____ c. Telephone, cable, and electrical systems; and
_____ d. Storm drainage system including existing and proposed drain lines, culverts, catch basins, headwalls, endwalls, hydrants, manholes, and drainage swales.

✓ 10. Erosion and sedimentation control plan required by §175-32 to prevent the pollution of surface or groundwater, erosion of soil both during and after construction, excessive run-off, excessive raising or lowering of the water table, and flooding of other properties, as applicable.

✓ 11. Existing and proposed topography at two-foot contour intervals, or such other contour interval as the Board shall specify. All elevations shall refer to the nearest United States Coastal and Geodetic Bench Mark. If any portion of the parcel is within the 100-year floodplain, the area will be shown, and base flood elevations given. Areas shall be indicated within the proposed site and within 50 feet of the proposed site where soil removal or filling is required, showing the approximate volume in cubic yards.

✓ 12. A landscape, planting, and grading plan showing proposed changes to existing features.

✓ 13. Land Use District boundaries within 200 feet of the site's perimeter shall be drawn and identified on the Site Plan, as well as any Overlay Districts that apply to the property.

✓ 14. Traffic flow patterns within the site, entrances and exits, and loading and unloading areas, as well as curb cuts on the site and within 100 feet of the site. The Planning Board may, at its discretion, require a detailed traffic study for large developments or for those in heavy traffic areas to satisfy the requirements of §175-40N.

✓ 15. For new construction or alterations to any structure, a table containing the following information shall be included:

- _____ a. Estimated area of structure currently used and intended to be used for particular uses such as retail operation, office, storage, etc.;
- _____ b. Estimated maximum number of current and future employees;
- _____ c. Maximum seating capacity, where applicable; and
- _____ d. Number of parking spaces existing and required for the intended use.

✓ 16. Elevations at a scale of one-quarter inch equals one foot for all exterior facades of the proposed structure(s) and/or alterations to or expansions of existing facades, showing design features and indicating the type and color of materials to be used.

✓ 17. Where appropriate, the Planning Board may request soil logs, percolation test results, and storm run-off calculations.

18. Plans for disposal of construction and demolition waste, either on-site or at an approved disposal facility.

19. Part One of a long-form Environmental Assessment Form or Draft Environmental Impact Statement.

20. Where appropriate, a cultural resource survey of resources with historic or archaeological significance.

21. A letter from the Zoning Administrative Officer stating either that there are no outstanding zoning violations on the property or that the requested site plan approval is needed in order to correct a violation.

22. Other information that may be deemed necessary by the Planning Board.

- a) _____

- b) _____

- c) _____

c. Waivers

The Planning Board may waive or allow deferred submission of any of the information required in Subsection B above, as it deems appropriate to the application. Such waivers shall be discussed in the course of pre-application conferences. The Planning Board shall issue a written statement of waivers for all major projects. This statement shall be filed in the permanent record of the property.

- a) _____

- b) _____

- c) _____

- d) _____

- e) _____

D. Criteria

In reviewing Site Plans, the Planning Board shall ensure that the application complies with all applicable provisions of this Chapter, including the environmental performance standards in §175-40. The Planning Board shall also consider apply the criteria set forth below. The Planning Board may also refer for non-binding guidance to the three-volume set of illustrated design guidelines published by the New York Planning Federation in 1994, entitled *Hamlet Design Guidelines*, *Building Form Guidelines*, and *Rural Design Guidelines*. The Planning Board may also refer to the —Design Handbook|| adopted by the Philipstown Planning Board as advisory guidelines for the Route 9 Corridor as well as any other design guidelines that it adopts from time to time as non-binding advisory material. In applying the criteria contained in this subsection and the reference documents above, the Planning Board shall take into consideration the location, character, and context of proposed development and adapt these criteria to the setting (*e.g.* rural, hamlet, institutional, suburban, industrial) as appropriate.

1. Layout and Design

 a. To the maximum extent practicable, development shall be located to preserve the natural features of the site and to avoid wetland areas, steep slopes, significant wildlife habitats, and other areas of environmental sensitivity. The placement and design of buildings and parking facilities shall take advantage of the site's topography, existing vegetation, and other pertinent natural features. The Planning Board may require that an applicant prepare a conservation analysis as described in §175-20A of this Chapter.

 b. All structures in the plan shall be integrated with each other and with adjacent structures and shall have convenient access between adjacent uses. Structures shall, where practical, be laid out in the pattern of a traditional hamlet.

 c. Except for retail and service businesses that require visibility, the visual impact of structures from public roads shall be minimized through the use of vegetative screening, topography, and colors that blend with the natural surroundings. Structures that are visible from public roads shall be compatible with each other and with traditional structures in the surrounding area in architecture, design, massing, materials, proportion, texture, color, and placement. Building components such as windows, roof lines and pitch, doors, eaves, and parapets shall be compatible with historic structures in the Town. Vertical, double-hung windows and steeply pitched roofs are encouraged but will not be required. Rooftop and ground level mechanical equipment shall be screened from public view using materials harmonious with the building, or shall be located where they are not visible from any public ways or other adjacent properties.

 d. Where appropriate, setbacks shall maintain and continue the existing setback pattern of surrounding properties.

 e. The Planning Board shall encourage the creation of landscaped parks or squares easily accessible by pedestrians.

 f. Trademarked architecture which identifies a specific company by building design features shall be prohibited, unless the applicant can demonstrate that the design is compatible with the historic architecture of the Town or the Building Form Guidelines.

 g. Impacts on historic and cultural resources shall be minimized.

 h. Newly installed utility service systems and service modifications necessitated by exterior alterations shall be installed underground. When feasible, existing aboveground utility service systems shall be placed underground.

 i. Buildings shall have a finished exterior on all sides.

✓ j. Metal buildings that are principal buildings (larger than a small storage building in an unobtrusive location) shall be of color consistent with earth tones; shall have sufficient fenestration and trim to break continuums of metal wall areas; and shall have brick, stone, wood trim or composite materials providing a similar appearance, and features combined with the basic metal enclosure. A complete package of elevations shall accompany any proposal for a metal building.

2. Landscaping and screening. Landscaping shall be provided and permanently maintained as follows:

✓ a. All areas of the lot not covered by buildings and other structures, outside storage and approved paving shall be suitably landscaped with trees and/or shrubs, lawns or other suitable landscaping or shall be left as natural terrain, if not disturbed by filling, grading or excavation.

✓ b. In the HC and OC districts, a strip of land not less than 20 feet in width and located in the area required for a building setback from a residence district boundary line, or all of such setback area on the lot if less than 20 feet in width, shall be left and maintained in its natural state if already wooded or shall be landscaped with evergreen trees planted to grow into a dense evergreen buffer strip within five years.

n/a c. In the M district, a strip of land not less than 30 feet in width and located in the area required for a building setback from a residence district boundary line, or all of such setback area on the lot if less than 30 feet in width, shall be left and maintained in its natural state if already wooded or shall be landscaped with evergreen trees planted to grow into a dense evergreen buffer strip within five years.

✓ d. Off-street parking and loading areas shall be provided with landscaped planting islands within or border landscaping adjacent to such area in such a manner as to enhance the appearance of the area. Any parking area accommodating 20 or more cars shall be provided with not less than one tree for each 20 cars or fraction thereof, which trees shall be not less than three inches diameter at breast height and 10 feet in height.

n/a e. Landscaping, including grading, provided in the area required for a building setback from the street line or center line of U.S. Route 9 shall be of a type, size and height as to avoid obstruction of minimum sight lines along the highway as well as from access driveways onto the highway, whether located on the lot or any other lot, as specified by the State Department of Transportation.

✓ f. All landscaping materials shall be of a type and/or species suitable for the location of the lot in the Town and suitable for the soil conditions on the lot and shall be planted and maintained in accordance with good landscaping practice. Landscaping shall be designed to facilitate conservation of the environment and preservation of community aesthetic character. This shall be accomplished through the use of native plant material and the retention of existing natural vegetation, thereby reducing or eliminating the need for irrigation, pesticides, herbicides, and fertilizers.

✓ g. All landscaping, including growing materials, that are specified on an approved landscape plan for a site shall be well maintained to carry out the intent of the landscape plan. Failure to maintain healthy landscaping associated with a site plan approval will be a violation of said approval.

✓ h. Trees, shrubs and other plant materials which die or are otherwise not in a condition to fulfill the approved landscape plan shall be replaced in the next planting season by similar plant material.

✓ i. Fences and walls used for landscaping and screening shall be made of natural materials such as wood, stone or brick or otherwise effectively landscaped.

✓ j. Landscaping shall be an integral part of the entire project area and shall buffer the site from and/or integrate the site with the surrounding area, as appropriate.

✓ k. Existing native tree stock eight or more inches in diameter at breast height shall be protected and preserved to the extent possible to retain valuable community natural resources and promote energy conservation by maximizing the cooling and shading effects of trees. The preservation of mature plant species, hedge rows, wetlands, and woodlots shall be encouraged and included as a design element in the development of the site.

✓ l. If deemed appropriate for the site by the Planning Board, shade trees at least six feet tall and two-inch caliper shall be planted and maintained at 20- to 40-foot intervals along roads at a setback distance acceptable to the Highway Superintendent.

3. Parking, Circulation, and Loading

✓ a. Roads, driveways, sidewalks, off-street parking, and loading space shall be safe, and shall encourage pedestrian movement.

✓ b. Vehicular and pedestrian connections between adjacent sites shall be provided to encourage pedestrian use and to minimize traffic entering existing roads. The construction of connected parking lots, service roads, alleys, footpaths, bike paths, and new public streets to connect adjoining properties shall be required where appropriate.

✓ c. Off-street parking and loading standards in §175-38 shall be satisfied.

✓ d. Access from and egress to public highways shall be approved by the appropriate highway department, including Town, County, and State.

✓ e. All buildings shall be accessible by emergency vehicles.

✓ f. Parking spaces shall have wheel stops or curbs to prevent injury to trees and shrubs planted in landscaped islands.

✓ g. Bicycle parking spaces and racks shall be provided in an area that does not conflict with vehicular traffic. Designated van/car pool parking, and other facilities for alternatives to single occupancy vehicle use shall be provided wherever possible.

✓ h. In developments where links to schools, churches, shopping areas, trails, greenbelts, and other public facilities are feasible, or where a trail connection is recommended in the Comprehensive Plan or in a Town Open Space Plan, a trail corridor shall be reserved on the approved Site Plan for this purpose.

✓ 4. Reservation of Parkland

For any Site Plan containing residential units, the Planning Board may require the reservation of parkland or payment of a recreation fee pursuant to Town Law, §274-a(6).

5. Outside Storage

Any areas for outside storage (including temporary storage of waste materials; storage and display of merchandise, supplies, machinery and other materials; and outside manufacture, processing or assembling of goods; but excluding areas for parking of registered motor vehicles in daily use) shall be shown on the site plan and located and screened as follows:

✓ a. In the HC and OC districts, outside storage areas shall not extend into the area required for a building setback from a street line or from the center line of U.S. Route 9, as determined under § 175-30(J), or from a residential district boundary line. Outside storage shall be enclosed (except for necessary access drives) by buildings and/or fences, walls, embankments or evergreen shrubs or trees so as to screen the storage area from view from any other adjacent lot or any street. In no case shall the height of outside

storage exceed the height of the approved screening. Screening shall be of a density as to be at least 75% effective in screening such view, at the time of occupancy, except that when evergreens are used, such height and density shall be achieved within five years after establishment of the outside storage area.

b. Outside storage on properties in the HC or OC districts shall not exceed 20% of the lot area located in such district.

n/a c. In the M District, outside storage areas shall not extend into the area required for a building setback from a property line, or a residence district boundary line, and shall not exceed 15% of the lot area located in the industrial M District.

6. Miscellaneous Standards

a. Buildings and other facilities shall be designed, located, and operated to avoid causing excessive noise on a frequent or continuous basis.

b. Drainage of the site shall recharge ground water to the extent practicable. The peak rate of surface water flowing off-site shall not increase above pre-development conditions and shall not adversely affect drainage on adjacent properties or public roads.

c. Applicable requirements for proper disposal of construction and demolition waste shall be satisfied, and any necessary permits or agreements for off-site disposal shall be obtained.

d. No materials shall be placed below the finished grade of a site other than utilities, sand, gravel, rocks, and soil that are uncontaminated by any solid waste or hazardous materials. Materials that were previously contaminated and have been reconditioned shall not be permitted under this Subsection (e), except that decontaminated material may be used as a base for road or parking lot construction, provided that such decontaminated material does not pollute groundwater or surface water.

e. Structures shall be located, constructed, and insulated to prevent on-site noise from interfering with the use of adjacent properties. Similarly, buildings shall be situated to prevent off-site noise from intruding on new development. Methods for blocking noise shall be used where appropriate, and shall include fencing, walls, and natural buffers, such as berms and landscape planting with trees and large shrubs.

f. Lighting shall comply with the standards in §175-40L.

§175-68 IMPLEMENTATION, REVISION, AND ENFORCEMENT OF APPROVED SITE PLANS

A. Within 6 months after receiving approval of a Site Plan, with or without modifications, the applicant shall submit multiple copies of the Site Plan, as determined by the Planning Board, for stamping and signing. The Site Plan submitted for stamping shall conform strictly to the Site Plan approved by the Planning Board, except that it shall further incorporate any required revisions or other modifications and shall be accompanied by the following additional information:

1. Record of application for and approval status of all necessary permits from Federal, State, and County officials.
2. Detailed sizing and final material specification of all required improvements.
3. An estimated project construction schedule. If a performance guarantee pursuant to Subsection B is to be provided by the applicant for all or some portion of the work, a detailed site improvements cost estimate shall be included.
4. Proof of payment of the Planning Board's reasonable review costs.

5. Upon stamping and signing the Site Plan, the Planning Board shall forward copies of the approved Site Plan to the Zoning Administrative Officer and the applicant. The Zoning Administrative Officer may then issue a Building Permit. A Certificate of Occupancy may only be issued if the project conforms to all applicable requirements of the Site Plan Approval.

B. Performance Guarantee

No Certificate of Occupancy shall be issued until all improvements shown on the Site Plan are installed, or a sufficient performance guarantee has been posted for improvements not yet completed. The performance guarantee shall be posted in accordance with the procedures specified in §277 of the Town Law relating to subdivisions. The amount and sufficiency of such performance guarantee shall be determined by the Town Board after consultation with the Planning Board, Town Attorney, Zoning Administrative Officer, other local officials, and its consultants.

C. As-Built Plans and Inspection of Improvements

No Certificate of Occupancy shall be granted until the applicant has filed a set of as-built plans with the Zoning Administrative Officer, indicating any deviations from the approved Site Plan. The Zoning Administrative Officer shall be responsible for ensuring compliance with the site plan approval and for the inspection of site improvements, including coordination with the Town's consultants and other local officials and agencies, as may be appropriate, and shall grant a Certificate of Occupancy upon a finding that the project as built complies in all material respects with the Site Plan. The Zoning Administrative Officer shall also have the authority to inspect soil mines for compliance with conditions authorized by §175-17.2D throughout the life of the mine. Costs of any required inspections may be charged to the applicant as provided in section §71-3 of the Town Code.
